PRESIDENT’S CORNER

CCPA is the only state-level archaeological professional organization in Colorado. The issues that arise are varied and more or less important to us individually. Since as individuals we have only a limited ability to influence policy making, one of the functions of CCPA is to represent us collectively. As president, a specific goal that I have set for myself is to organize and constitute an Advisory Committee to the State Archaeologist’s Office and the State Office of Historic Preservation. In its official capacity, this committee would represent us as a professional organization. A similar committee has existed in the Colorado Archaeological Society and I believe that it is overdue in CCPA.

I plan to make a proposal to the executive board at our summer meeting in July. I would like to see the committee composed of four at large members with the widest possible representation of regions and subdisciplines, and a chairperson who would be a member of the executive board (possibly the president). The membership of the committee would be appointed by the president subject to review by the executive board. Members should be selected to represent the four main regions of the state (NW, NE, SE, SW) and as many subdisciplines as possible. These should include, but not be limited to, academic, research, government agency, and contract anthropology; etc. Ideally, each member would represent a combination of the above, e.g. an individual may represent the Northwest, academia, research and historic archaeology. In this case, other members should be selected to represent other regions and other subdisciplines. Of course, it is very unlikely that it will be possible to constitute a committee that covers all subdisciplines, but we should at least strive for complete regional representation.

At this point, this is only a proposal, but I would like to move on this so that a committee could be appointed after the summer board meeting in July. Please consider this and get back to me with specific suggestions before the board meeting. I would be happy to talk to anyone about this, but it might be best to write your ideas down as I will be conveniently out of the country between 27 May and 25 June.

I would like to bring to your attention an issue that has surfaced in CCPA, which is exactly the sort of concern that would be appropriately handled through an advisory committee. There has been a growing concern expressed by a number of CCPA members, relating to the process of historic archaeological site evaluation for determination of eligibility to the National
Register of Historic Places. Several members have indicated to the CCPA board on the SHPO that they think that historic archaeological sites are not being evaluated under the same criteria as prehistoric sites. This seems to be the case. Specifically at issue is the evaluation of significance of buried/nonstructural remains. In prehistoric sites, criterion "d" is applied when a case can be made that archaeological remains have the potential to contribute to our understanding of the past cultures, lifeways, etc. in sites, the deposits etc. are being evaluated as to their potential to contribute significantly to history (not necessarily from an anthropological perspective). This is a vital difference and has resulted in many sites being classified as nonsignificant by the SHPO, even though they were identified as potentially significant by the archaeologist. This issue will be visited by the Colorado Historic Preservation Review Board at its next meeting, July 17, 1992, at the Colorado History Museum, 1300 Broadway, Denver, Colorado 80203. I would urge those of you who are concerned with this issue to attend this meeting and express your views. This is your opportunity to be heard by the entire board. I believe to be effective you will have to present compelling arguments that historical archaeological sites may contain information important to anthropological interests as well as historical.

Although I hope no other critical issues will arise during my absence, you may contact Michael Piontkowski, President Elect, or any of the other executive board members in my absence. I look forward to serving you this year.

Bruce Bradley, CCPA President

COLORADO HISTORIC PRESERVATION REVIEW BOARD MEETING JULY 17, 1992 AT THE COLORADO HISTORY MUSEUM, 1300 BROADWAY, DENVER.

EDITOR'S CORNER

Well this is my first ever attempt at putting a newsletter together and I must say, it's been rather fun. I want to thank all of you who sent me material and those of you who didn't, well the next newsletter is due out in October. When you send me material for the newsletter, please send a hard copy and a diskette version, preferably on a 5 1/4" floppy disk. At the next CCPA meeting, I'll return all of the diskettes to their owners. I want to thank the staff at Alpine, especially Sheila for her help with formatting nightmares and mailing labels.

After talking with many of you at the last CCPA meeting in Grand Junction and hearing your suggestions about the kinds of things you want to see in the newsletter, I decided some kind of "needs assessment" would be helpful.

I would hope that all of you will convey to me your thoughts, ideas, concerns; anything that will make the CCPA Newsletter better. We are all super busy but this does not have to be anything formal. Just send a post-card, a fax, or better yet, give me a call. In short, what do you want to see in your Newsletter? What should be avoided? I have several ideas of my own: more regional news, short lists of contract reports recently available from contract and/or governmental organizations; and editorials on issues important to CCPA an the archaeological community. I hope to add some comedy to the Newsletter; we all can use a bit of humor in our lives. The newsletter editor can't do all of this, so please send your ideas, submissions and comments to me.

If any of you would like to volunteer as regional editors, that would be most appreciated. I'm looking for representatives from the Front Range, eastern Plains, southwest, and northwestern portions of the state. Regional editors will help in getting material sent to the editor which has been somewhat of a problem in the past. Send me stuff, I'll just about publish anything that may be of interest to the membership.
I am looking forward to this gig as Newsletter editor. I would like to see the Newsletter go back to four issues per year, but that will be up to the membership. Let me know what you think.

Sincerely,

Ronald J. Rood
CCPA Newsletter Editor

WARD WEAKLY FUND BOOKSALE
BIG SUCCESS

The Ward F. Weakly Memorial Fund used book sale at the Grand Junction CCPA/UPAC meeting was very successful. Almost all of the books were sold, netting the scholarship fund $170.00. An additional $75.00 was collected during the traditional "pass the hat" exercise. This resulted in a total of $245.00 to add to the fund.

A big THANKS to all members who contributed their used books! And a big THANKS to the CCPA committee members who staffed the book sale tables.

Next year's meeting will feature a USED BOOK AND WHITE ELEPHANT SALE to raise money for the scholarship effort. Don't give those old books/journals way. Start saving them now, along with any WHITE ELEPHANTS that you're considering giving away. Remember, your trash may be somebody's treasure!

DAN BACH RECEIVES WARD F. WEAKLY MEMORIAL FUND AWARD

University of Northern Colorado junior Dan Bach is the first recipient of the CCPA Ward Weakly scholarship. Bach is pursuing an interdisciplinary degree in archaeological biology. His senior thesis involves the analysis of floral and faunal materials collected from the Sylvan Dale Archaeological Project under the direction of CCPA member Bob Brunswig. The $400.00 scholarship is specifically for pollen slides, slide storage boxes, a Hand-Tally Counter, plant press and accessories, chemical and stains, glassware, slides and cover slips, and other supplies needed in his laboratory work. After his project is complete, remaining materials will be donated to the University's archaeological laboratory. Bach is planning to continue his studies and attend graduate school in Colorado. Congratulations Dan!!! Submitted by Adrienne Anderson

COMMENTARY

The field season is here and we should all be aware of the dangers lurking in the field of archaeology. Archaeologists deal with snakes, bugs, heat, cold, irate landowners, irate federal employees and of course, irate archaeologists. I especially wanted to make sure that all field archaeologists were aware of the most dangerous and evil of all the perils we face everyday. I am of course talking about mayonnaise and the unsafe use of mayonnaise on sandwiches and other lunch items. Mayonnaise is very dangerous, especially after its been on a sandwich laying on the dashboard of a pickup all day in the sun. Even if you take care in the storage of you mayonnaise infested foods, can you really be sure the stuff is safe to eat? If you don't believe me, ask Bob Nykamp. If you are unsure of the dangers of this vile substance, and are not willing to take my testimony as to its dangers, just pick up a recent issue of U.S. News and World
Report, New England Journal of Medicine or the Star. Current research points a dirty finger at mayonnaise as a cause of misread datums, crooked walls, misplaced samples, and overdue reports. Is the use of this substance worth the risk to our profession? Please, all of you, be careful out there. The only sure way to safeguard yourselves is to avoid mayonnaise at all costs.

Submitted by Ron Rood

A REPLY TO ROOD

Rood's vicious attack on mayonnaise typifies the paranoid, senseless food hysteria that periodically plagues our society. He seeks to make of this harmless and, indeed, beneficial, condiment a pariah among foods, implying a host of ill defined and unsubstantiated dangers associated with mayonnaise consumption. Nothing could be further from the truth. Rood's misguided attempt to disparage this valuable food is probably more an outgrowth of his own traumatic childhood experiences with mayonnaise than the result of any systematic analysis or overview of the evidence. I consume pounds of mayonnaise in the field daily and have never suffered any ill effects. In fact, I sincerely believe that field crews sustained on large quantities of this healthful food will evince superior performances and increased work output. Luckily, I think that most archaeologists will see through Rood's self-serving diatribe, and will continue to carry that ever-present jar of mayonnaise in their backpack alongside their trowel, compass, tape measure and all of the other indispensable accessories to archaeological research.

Submitted by Rand Greubel

CURRENT RESEARCH

The Chipeta Chapter of the Colorado Archaeological Society recently completed a salvage excavation at archaeological site 5DT192 northwest of Delta, Colorado. This salvage excavation was completed with the cooperation of the Montrose office of the BLM and Rich Fike. This site is a complex site consisting of game drive fences, hunting blinds, and a hearth tethered activity area. The Chipeta Chapter members, under the direction of Clark Pope and Ron Rood excavated 12 square meters around a hearth that was being eroded. The hearth is a large slab-lined feature that was associated with a large quantity of fire-cracked rock. One side-notched projectile point was recovered from the excavation. Chipeta Chapter members will be assisting in the analysis, and write-up of the site.

During the 1991 field season, Alpine Archaeological Consultants, Inc. completed a portion of the TransColorado Natural Gas Pipeline route through western Colorado and northwestern New Mexico. Approximately 243 miles of centerline and 11 miles of access road were surveyed. A total of 290 archaeological sites representing at least 323 archaeological components were identified. These consist of 2 possible Paleoindian components, 33 Archaic components, 40 Anasazi components, 14 non-Anasazi Formative components, 14 Ute components, 4 Dinetah phase Navajo components, 10 Hispanic components, and 89 Euro-American components. In addition, 118 unknown aboriginal sites or components comprising lithic scatters were documented.

Rand Greubel - Alpine

Alpine Archaeological Consultants Inc., is working on three sites discovered within the Kern River Pipeline trench in southwestern Wyoming. These sites represent deeply buried resources with radiocarbon dates of 8,600, 7,500, and 4,000 years B.P. The 4,000 B.P. component is associated with a housepit and several slab lined features. Excavations are set to begin in early June and continue throughout most of the summer.

Ron Rood - Alpine
One of the projects Foothill Engineering Consultants, Inc. recently completed was the report on a survey of approximately 2800 acres for the Horsefly Creek Burn Timber Sale, Uncompahgre National Forest, Montrose County, Colorado. This area on the Uncompahgre Plateau was burned during a forest fire in June of 1990. The results of this survey were especially interesting because the area was surveyed the season immediately following the burn. In many portions of the project area, ground visibility was nearly 100%, even in forested areas where duff and vegetation were normally dense. Prehistoric sites were recorded not only in the expected locations on open benches and ridges near water, etc., but in many cases extended well into the forested areas, with some very large sites located entirely within the forest. The number and size of the sites was also much greater than anticipated, e.g., one site was 29 acres and another covered 139 acres and included numerous concentrations. Based on this survey, it appears that the accuracy of recording the extent of a prehistoric site in forested areas is related directly to ground visibility, i.e., the greater the ground visibility, the more accurate the recording. One disadvantage to surveying a burned area was the increased difficulty in being able to distinguish obsidian and other black artifacts from all of the blackened wood, etc. Also, some perishable surface features, such as wickiups, may have been destroyed. Overall, the advantages of being able to accurately identify site boundaries within recently-burned areas appears to far outweigh the other disadvantages.

Marilyn Martorano - Foothills

DUES ARE NEEDED

The following individuals have not paid their dues for at least two years. We will purge them from the membership list unless dues are submitted real soon. Send your dues to Jane Anderson, 4516 W. South County Line Road, Longmont, Colorado, 80503.

BRETERNITZ AND MORRIS NAMED FELLOWS OF CCPA

Dr. Elizabeth Morris and Dr. Dave Breternitz were named as Fellows by the general CCPA membership at the last meeting in Grand Junction. They join a long list of distinguished members and we congratulate them.

ARCHAEOLOGISTS ON THE MOVE

Part of the function of the CCPA Newsletter will be to try and keep track of everyone. If you move to a new job, if you hire new folks, let the Newsletter editor know.
Leon Lujan has been selected as a new Resource Area archaeologist for the Bureau of Land Management San Juan Resource Area, Colorado. Leon takes over Max Witkind's position and Max has moved to a new BLM Resource Area in Arizona. Congratulations to both Leon and Max.

Dan Jepsen has been named the new Colorado Department of Highways Archaeologist. Deb Angulski has moved on to a new position with the Department of Highways.

Gary Matlock is back on the San Juan National Forest.

Steve Creasman of Western Wyoming College has taken a job in Kentucky.

The Forest Service in Colorado has hired three new Zone/District positions. The North Zone covers the Taylor River and Cebolla Ranger districts and will be based in Gunnison. The new archaeologist is Roy Rossman. The South Zone covers the Norwood and Ouray districts and will be based in Norwood. Robert "Bob" McKeever is the new archaeologist for the South Zone. Sally Crum will be the archaeologist for the North Zone which covers the Grand Junction, Collbran and Paonia districts. Congratulations to Sally, Bob, and Roy.

ANNOUNCEMENT

At the 1992 business meeting, the membership voted to create a CCPA brochure to provide information about our organization to undergraduate and graduate students, and professionals. I am currently working on a mock-up of the brochure and would appreciate any suggestions regarding content, format, etc. My idea is to keep it simple and provide information on the following: 1) goals of the organization, 2) activities (meetings, symposiums, paper sessions, etc.), and 3) membership requirements (with a mail-in form). It was also voted to reprint the CCPA Occasional Papers No.1, Archaeology of the Eastern Ute: A Symposium. The problem is that the original camera-ready copy is nowhere to be found. If you have this document in some lost corner of your office or know where it might be located, PLEASE call Marilyn Martorano at work (303)278-0622, or at home (303)776-6095.

EATIN' ON THE C.R.M. ROAD

The field season is here and many of us are eating out; perhaps more than we want. A new feature of the CCPA Newsletter will be restaurant recommendations for restaurants of choice across Colorado and adjacent areas where we all work. Send in your suggestions. Bon Apatite!!!

Meeker, Colorado - "Last Chance" Mexican food, great BBQ ribs, beef, all from their own smoker. Good selection of other items including Gyros, steaks, fried ochra, salad bar and various sandwiches. According to our reviewers, Clark Pope and Carrie White, it's Meeker's only chance.

Green River, Utah - Nothing to report.

Mountain View, Wyoming - "Mountain View Drive In" Great burgers, fries, shakes, and superior chicken nuggets. All in all you can't go wrong at the Mountain View Drive In.

Bellfield, North Dakota - "Trappers Kettle" Generally good food but avoid the water and anything made with water.

Evanston, Wyoming - "Sorella's" Excellent Italian food and the best service in southwestern Wyoming. We would recommend the stuffed shells and any of the chicken plates. Also, they are used to parties of archaeologists.

!!! DUES !!!

Those of you who have not paid you 1992 dues please do so ASAP. Send your check for $15.00 to: Jane Anderson, CCPA Treasurer, 4516 W. South County Line Road, Longmont, Colorado, 80503. The attached membership list will indicate the last year we have a record of you paying dues.
ATTENTION ALL CCPA MEMBERS

A goal of CCPA is to attract new members. That is the only way the organization will grow and remain a viable group speaking for the issues of Colorado and regional archaeological concerns. All of us should encourage membership to seasonal employees, archaeologists moving here from other places, and archaeologists working in other states and regions. We especially need to encourage students to join CCPA and to bring former members back on to the rolls.

ARCHAEOLOGY AWARENESS WEEK
A BIG HIT ACROSS STATE

Sources have passed on to us that Archaeology Awareness week was a huge success across Colorado. Members of CAS and the professional community set up poster displays, archaeology displays, history displays in schools, banks, and malls across the state. In Montrose, the Chipeta Chapter of CAS organized a newspaper inset in the daily newspaper and sponsored a talk by Fred Blackburn on his research into the Grand Gulch expeditions during the late 1800’s.

50TH PLAINS CONFERENCE, NOVEMBER 11-14, 1992, LINCOLN, NEBRASKA.

COLORADO HISTORIC PRESERVATION REVIEW BOARD MEETING JULY 17, 1992 AT THE COLORADO HISTORY MUSEUM, 1300 BROADWAY, DENVER.

COLORADO COUNCIL OF PROFESSIONAL ARCHAEOLOGISTS
TREASURERS REPORT--FISCAL YEAR 1991-1992

April 30, 1992

The final CCPA Treasurer's report for fiscal year (FY) 1991-1992, which ended on March 31, 1992, is presented. Summarized below are income/expenses and membership for the past year.

Income and Expenses

A detailed summary of receipts and disbursements for FY 1991-1992, as compared with the two preceding years, is given below.

</tbody>
</table>

From a financial standpoint, FY '91-'92 has been a rather quiet year. Dues are down 38 percent from last year and 27 percent from the previous year; interestingly, however, they equal those of FY '88-'89. All other income categories are reduced from the previous year. Miscellaneous Income includes a payment from the Utah Professional Archaeological Council for their share of the 1992 annual meeting cost and the purchase of several unused mailing tubes by a third party. The Ward Weakly Memorial Fund (WWMF) continues to grow, but this growth lags slightly behind last year's income. The WWMF has a current balance of $2,326.81.

Fortunately, our costs this year are reduced from previous years. The most costly line item is the annual meeting expenses, but those costs are less than last year. No newsletter expenses were received, but I presume there will be some. The Special Functions category reflects a $1,000.00 donation to the Colorado Archaeological Society for the production of the Colorado Archaeology Preservation Week poster.
Membership

Total paid memberships for FY 1991-1992 total 136, over half of whom have paid their 1992 dues. The membership breakdown by class and by year as of the end of FY 1991-1992 is as follows:

<table>
<thead>
<tr>
<th>Membership Class</th>

Fifteen members who have not paid their 1991 dues for at least two years have been purged from the active membership list; these members are listed below.

Bruce Anderson  
Harley J. Armstrong  
Peggy Barnett  
James Brechtel  
Linda Scott Cummings  
Frank W. Eddy  
Raymond G. Harriman  
Katherine Johnson  
Priscilla E. Mecham  
Paul R. Nickens  
Bret Overturf  
John E. Peterson II  
Ann Pipkins  
Diane Lee Rhodes  
Dean J. Saitta

All members who have not paid their 1992 dues are encouraged to do so as soon as possible by remitting the appropriate amount ($15 for voting members and fellows, and $12.50 for associate members and subscribers) to the CCPA Treasurer.

Respectfully submitted,

Gordon C. Tucker Jr.
CCPA Treasurer
